Final Report

Organization: Test Org
Location: Test Loc

Patient: James Bond
Patient ID: 007
Home Phone:

DOB: 07/07/1992
Age: 29
Gender: Male

Accession: 61170
Provider: TEST PROVIDER
Collected: 02/09/2021 11:30 AM

Test Name	Result	Flag	Reference Range
COVID RT-PCR <i>Nasal Mid Turbinate Collection</i>	Detected	Detected	<i>Run by: JF on 02/09/2021 04:50 PM</i>

The quantitative LCMS/MS tests and the qualitative real-time PCR and isothermal amplification (rapid ID NOW) assays were developed and performance determined by Advanced Laboratory Services, LLC (not FDA-approved, but allowed under emergency use authorization). The PCR assays are designed to detect pathogens with a sensitivity and specificity exceeding 99%; the rapid ID (ID NOW Covid-19) assay has a sensitivity of >/=99.7% and specificity of >/=98.6%; as yet unknown targets may be detected resulting in false positive tests, and pathogen targets with sequence variability/mutation may not be detected resulting in false negatives. Test results are just one set of data which must be correlated with clinical signs and symptoms in making therapeutic decisions.
